LITERATURE REVIEW

FRAMING OUR WORK

We asked you to respond to some questions in advance of this meeting to help frame our work. Of those of you that responded...

1. All participants indicated interest in pursuing an in-depth synthesis of available tools and accompanying toolkit that includes best practices, stories from partners currently implementing and recommendations for clinician training, screening and referral and more. In addition, we partner with groups that are in the midst of developing their own SDOH tool and we support and advise their process and look to assist with the pilot testing.
2. All participants indicated interest in gathering as a small group
3. All participants indicated an interest in hearing from partners already implementing SDOH screening tools to gather barriers and best practices
