Re: Endorsement of H.R. 909/S.484 - The Moms Matter Act

Dear Chairman Pallone, Ranking Member McMorris Rodgers, Subcommittee Chairwoman Eshoo, and Subcommittee Ranking Member Guthrie:

We, the undersigned national behavioral health, maternal health, and health care professional organizations are writing to inform you of our strong support of the bipartisan Moms Matter Act H.R. 909/S. 484.

While up to 1 in 5
t mothers of any race can face mental health challenges during pregnancy and after childbirth, women of color are especially vulnerable in part due to facing higher degrees of stress,

Black mothers are also less likely to receive treatment.

This timely bill provides critical investments in programs to expand access to treatments and support for maternal mental health conditions and substance use disorders for individuals from racial and ethnic minority groups by:

1. Supporting an increase in the behavioral health workforce, specifically increasing the numbers of Black and Minority behavioral health and substance use disorder providers

2. Investing in community based and minority led maternal mental health support services led by or in partnership with community-based organizations.

The Moms Matter Act addresses the need for culturally congruent collaborative maternity care

4. https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3733216/
models; providing culturally congruent services and supports for people with maternal mental health conditions and substance use disorders in response to “Substantive data from consumer and family self-reports, ethnic match, and ethnic-specific services outcome studies suggest that tailoring services to the specific needs of these [ethnic] groups will improve utilization and outcomes” 6 as written in the The Surgeon General's report, *Mental Health: Culture, Race, and Ethnicity*.

Additionally, The Moms Matter Act will supply funding through a grant program to grow and diversify the maternal mental and behavioral healthcare workforce. This section will mirror the language in the Perinatal Workforce Act (and it has the same funding amount of $75 million) but focuses specifically on growing and diversifying the workforce of *mental and behavioral health care providers who will specialize in maternal mental health conditions or substance use disorders*. “Culture is important in substance abuse treatment because clients' experiences of culture precede and influence their clinical experience.” 7

Many individuals and families in this country are grappling with mental health conditions and addictions, and it is critical that they find the culturally competent, educated care they need, particularly now. We urge you to support H.R. 909/S. 484 The Moms Matter Act.

Sincerely,
