Infant Mortality refers to death under age one per 1,000 live births. Preterm birth occurs before 37 weeks completed gestation. Late preterm birth occurs at 34 through 36 completed weeks gestation. Very preterm birth occurs before 32 completed weeks gestation. A low birthweight baby weighs less than 5 1/2 pounds (2,500 grams). A very low birthweight baby weighs less than 3 1/2 pounds (1,500 grams). 4:3:1:3:1 Series is four or more doses of diphtheria and tetanus toxoid and pertussis vaccine (DTaP), three or more doses of poliovirus vaccine, one or more doses of measles containing vaccine, three or more doses of Haemophilus influenzae type b vaccine, one or more doses of varicella.

## Preterm and Low Birthweight Births

- Infant mortality refers to death under age one per 1,000 live births.
- Preterm birth occurs before 37 weeks completed gestation.
- Late preterm birth occurs at 34 through 36 completed weeks gestation.
- Very preterm birth occurs before 32 completed weeks gestation.
- A low birthweight baby weighs less than 5 ½ pounds (2,500 grams).
- A very low birthweight baby weighs less than 3 ½ pounds (1,500 grams).
- 4:3:1:3:1:1 Series is four or more doses of diphtheria and tetanus toxoid and pertussis vaccine (DTP), three or more doses of poliovirus vaccine, one or more doses of measles containing vaccine, three or more doses of Haemophilus influenzae type b vaccine, one or more doses of varicella.

Preterm and low birthweight births refer to death under age one per 1,000 live births. Preterm birth occurs before 37 weeks completed gestation. Late preterm birth occurs at 34 through 36 completed weeks gestation. Very preterm birth occurs before 32 completed weeks gestation. Low birthweight baby weighs less than 3⅓ pounds (2,500 grams). A very low birthweight baby weighs less than 3 pounds (1,500 grams). 4:3:1:3:1 Series is four or more doses of diphtheria and tetanus toxoid and pertussis vaccine (DTaP), three or more doses of poliovirus vaccine, one or more doses of measles containing vaccine, three or more doses of Haemophilus influenza type b vaccine, one or more doses of varicella.

Early prenatal care pregnancy-related care beginning in the first trimester (1-3 months). Late/no prenatal care is pregnancy-related care beginning in the 3rd trimester (7-9 months) or when no pregnancy-related care was received at all.

Accurate and up-to-date data is crucial for understanding and addressing health issues. PeriStats, the March of Dimes interactive web resource, (marchofdimes.org/peristats) offers the latest data on maternal, infant, and child health at the national, state and local levels. The PeriStats logo indicates that more detailed and perhaps more current information is available on the website. (www.marchofdimes.org/peristats)

### Infant Mortality

- Infant mortality refers to death under age one per 1,000 live births.
- Preterm birth occurs before 37 weeks completed gestation.
- Late preterm birth occurs at 34 through 36 completed weeks gestation.
- Very preterm birth occurs before 32 completed weeks gestation.
- A low birthweight baby weighs less than 3 ½ pounds (1,500 grams).
- A very low birthweight baby weighs less than 2 ½ pounds (1,000 grams).
- 4:3:3:1 Series is four or more doses of diphtheria and tetanus toxoid and pertussis vaccine (DTP), three or more doses of poliovirus vaccine, one or more doses of measles containing vaccine, three or more doses of Haemophilus influenzae type b vaccine, one or more doses of varicella.

### Infant Mortality

- Infant mortality refers to death under age one per 1,000 live births.
- Preterm birth occurs before 37 weeks completed gestation.
- Late preterm birth occurs at 34 through 36 completed weeks gestation.
- Very preterm birth occurs before 32 completed weeks gestation.
- A low birthweight baby weighs less than 5 ½ pounds (2,500 grams).
- A very low birthweight baby weighs less than 3 ½ pounds (1,500 grams).
- 4:3:1:3:3:1 Series is four or more doses of diphtheria and tetanus toxoid and pertussis vaccine (DTaP), three or more doses of poliovirus vaccine, one or more doses of measles containing vaccine, three or more doses of Haemophilus influenza type b vaccine, one or more doses of varicella.

Preterm and Low Birthweight Births
- Infant mortality refers to death under age one per 1,000 live births.
- Prenatal birth occurs before 37 weeks completed gestation.
- Late preterm birth occurs at 34 through 36 completed weeks gestation.
- Very preterm birth occurs before 32 completed weeks gestation.
- A low birthweight baby weighs less than 3 ½ pounds (2,500 grams).
- A very low birthweight baby weighs less than 3 pounds (1,500 grams).
- 4:3:1:3:3:1 Series is four or more doses of diphtheria and tetanus toxoid and pertussis vaccine (DTaP), three or more doses of poliovirus vaccine, one or more doses of measles containing vaccine, three or more doses of Haemophilus influenzae type b vaccine, one or more doses of varicella.

Preterm and Low Birthweight Births
- Infant mortality refers to death under age one per 1,000 live births.
- Preterm birth occurs before 37 weeks completed gestation.
- Late preterm birth occurs at 34 through 36 completed weeks gestation.
- Very preterm birth occurs before 32 completed weeks gestation.
- A low birthweight baby weighs less than 5 ½ pounds (2,500 grams).
- A very low birthweight baby weighs less than 3 ½ pounds (1,500 grams).
- 4:3:1:3:1:1 Series is four or more doses of diphtheria and tetanus toxoid and pertussis vaccine (DTP), three or more doses of poliovirus vaccine, one or more doses of measles containing vaccine, three or more doses of Haemophilus influenzae type b vaccine, one or more doses of varicella.

### Infant Mortality

- Infant mortality refers to death under age one per 1,000 live births.
- Preterm birth occurs before 37 weeks completed gestation.
- Late preterm birth occurs at 34 through 36 completed weeks gestation.
- Very preterm birth occurs before 32 completed weeks gestation.
- A low birthweight baby weighs less than 3 ½ pounds (1,500 grams).
- A very low birthweight baby weighs less than 2 ½ pounds (1,000 grams).
- 4:3:1:3:1 Series is four or more doses of diphtheria and tetanus toxoid and pertussis vaccine (DTap), three or more doses of pneumococcal vaccine, one or more doses of measles-containing vaccine, three or more doses of Haemophilus influenzae type b vaccine, one or more doses of varicella.

---

**Note:**

- Infant mortality refers to death under age one per 1,000 live births.
- Prenatal care occurs before 37 weeks completed gestation.
- Late preterm birth occurs at 34 through 36 completed weeks gestation.
- Very preterm birth occurs before 32 completed weeks gestation.
- A low birthweight baby weighs less than 5 ½ pounds (2,500 grams).
- V. a very low birthweight baby weighs less than 3 ½ pounds (1,500 grams).
- 4:3:1:3:3:1 Series is four or more doses of diphtheria and tetanus toxoid and pertussis vaccine (DTaP), three or more doses of poliovirus vaccine, one or more doses of measles containing vaccine, three or more doses of Haemophilus influenza type b vaccine, one or more doses of varicella.

## Infant Mortality

- Infant mortality refers to death under age one per 1,000 live births.
- Preterm birth occurs before 37 weeks completed gestation.
- Late preterm birth occurs at 34 through 36 completed weeks gestation.
- Very preterm birth occurs before 32 completed weeks gestation.
- A low birthweight baby weighs less than 3.5 pounds (2,500 grams).
- A very low birthweight baby weighs less than 2.5 pounds (1,500 grams).
- 4:3:1:3:3:1 Series is four or more doses of diphtheria and tetanus toxoid and pertussis vaccine (DTaP), three or more doses of poliovirus vaccine, one or more doses of measles containing vaccine, three or more doses of Haemophilus influenza type b vaccine, one or more doses of varicella.

## Additional State Data and the March of Dimes Data Book for Policy Makers may be downloaded at marchofdimes.org/advocacy/research-and-data.aspx

Early preterm care is pregnancy-related care beginning in the first trimester (1-3 months).
Late/no preterm care is pregnancy-related care beginning in the 3rd trimester (7-9 months) or when no pregnancy-related care was received at all.

### Infant mortality

- Infant mortality refers to death under age one per 1,000 live births.
- Preterm birth occurs before 37 weeks completed gestation.
- Late preterm birth occurs at 34 through 36 completed weeks gestation.
- Very preterm birth occurs before 32 completed weeks gestation.
- A low birthweight baby weighs less than 5 ½ pounds (2,500 grams).
- A very low birthweight baby weighs less than 3 ½ pounds (1,500 grams).
- 4:3:1:3:1:3 Series is four or more doses of diphtheria and tetanus toxoid and pertussis vaccine (DTaP), three or more doses of poliovirus vaccine, one or more doses of measles containing vaccine, three or more doses of Haemophilus influenzae type b vaccine, one or more doses of varicella.
- Early prenatal care is pregnancy-related care beginning in the first trimester (1-3 months).
- Late preterm care is pregnancy-related care beginning in the 3rd trimester (7-9 months) or when no pregnancy-related care was received at all.

Preterm and Low Birthweight Births

Infant Mortality

Infant mortality refers to death under age one per 1,000 live births.
Preterm birth occurs before 37 weeks completed gestation.
Late preterm birth occurs at 34 through 36 completed weeks gestation.
Very preterm birth occurs before 32 completed weeks gestation.
A low birthweight baby weighs less than 5 ½ pounds (2,500 grams).
A very low birthweight baby weighs less than 3 ½ pounds (1,500 grams).
4:3:1:3:3:1 Series is four or more doses of diphtheria and tetanus toxoid and pertussis vaccine (DTaP), three or more doses of poliovirus vaccine, one or more doses of measles containing vaccine, three or more doses of Haemophilus influenzae type b vaccine, one or more doses of varicella.
