Health Promotion

Prenatal Care, 2014
Women who received early prenatal care 80.9
Women who received late or no prenatal care 4.3
Percent Children, 19-35 Months with Up-to-Date Immunizations, 2014
Polio 91.4%
4:3:1:3:3:1 Series 79.3%
Varicella 92.2%

Infant mortality refers to death under age one per 1,000 live births.
Preterm birth occurs before 37 weeks completed gestation.
Late preterm birth occurs at 34 through 36 completed weeks gestation.
Very preterm birth occurs before 32 completed weeks gestation.
A low birthweight baby weighs less than 3 ½ pounds (1,500 grams).
A very low birthweight baby weighs less than 3 pounds (1,500 grams).
4:3:1:3:3:1 Series is four or more doses of diphtheria and tetanus toxoid and pertussis vaccine (DTaP), three or more doses of poliovirus vaccine, one or more doses of measles containing vaccine, three or more doses of Haemophilus influenzae type b vaccine, one or more doses of varicella.

The Peristats logo indicates that more detailed and perhaps more current information is available on the website. (www.marchofdimes.org/peristats)

PeriStats, the March of Dimes interactive web resource, (marchofdimes.org/peristats) offers the latest data on maternal, infant, and child health at the national, state and local levels.

Early prenatal care is pregnancy-related care beginning in the first trimester (1-3 months).
Late/no prenatal care is pregnancy-related care beginning in the 3rd trimester (7-9 months) or when no pregnancy-related care was received at all.
