

Prematurity Campaign Collaborative

Charge to the Clinical & Public Health Practice Workgroup

December 15, 2016

Objective: Achieve demonstrated improvements in health equity and preterm birth by increasing effective use of evidence-informed clinical and public health practice (Column A in the Strategic Map):

- (1) Optimize public health systems and strategies to improve women's and adolescent health
- (2) Optimize clinical practices to improve women's and adolescent health
- (3) Support strategies to increase the intentionality of pregnancy
- (4) Ensure all women receive high quality prenatal care
- (5) Ensure appropriate care for all women with prior preterm birth

Charge to the Clinical & Public Health Practice Workgroup

1. Identify clinical practice areas in need of development (for example, aspirin prophylaxis to reduce preeclampsia).
2. Identify systematic approaches to achieving quality and reliability.
3. Identify opportunities to align and amplify efforts to increase the intentionality of pregnancy.
4. Articulate the role of the Work Group in advancing all of the above, including priorities for year one.
5. Serve as expert resource to collaborative organizations and others.
6. Explore potential working group and/or collaborative wide projects
