

# VACCINATION SCHEDULE FOR BABIES AND YOUNG CHILDREN

This is a typical vaccination schedule through age 6. Your child's health care provider may use a different one. All children need vaccinations for their own health and so they don't spread infection to others. Doses are listed by month. If a dose covers more than 1 month on the schedule, ask your baby's provider when your baby gets that dose.

Vaccination	Birth	1 month	2 months	4 months	6 months	12 months	15 months	18 months	24 months	4 to 6 years
<b>HepB</b> (protects against hepatitis B)	1st	2nd			3rd					
<b>DTaP</b> (protects against diphtheria, tetanus, pertussis)			1st	2nd	3rd		4th			5th
<b>Hib</b> (protects against haemophilus influenzae type b; may be 3 or 4 doses)			1st	2nd	3rd	4th				
<b>IPV</b> (protects against polio)			1st	2nd	3rd					4th
<b>RV</b> (protects against rotavirus; may be 2 or 3 doses)			1st	2nd	3rd					
<b>PCV13</b> (protects against pneumococcal disease)			1st	2nd	3rd	4th				
<b>Flu</b> (protects against influenza)					1 or 2 doses each year					
<b>MMR</b> (protects against measles, mumps, rubella; if travelling outside the U.S., your baby can get his first dose at 6 months)						1st				2nd
<b>Varicella</b> (protects against varicella, also called chickenpox)						1st				2nd
<b>HepA</b> (protects against hepatitis A)						1st and 2nd 6 to 18 months apart
