You can access a list of all available city and county data through the left hand menu. Follow the steps below to access the data.

**Note:** Data are not available on PeriStats for all cities or counties. If the location you are looking for is not listed, then data are not available for that city or county.

1. Click the "reset" button to clear the menu fields.
2. Click the "edit" link next to "Location." In the popup menu, click the arrow next to "Region" to open the dropdown menu and then select a region.
3. Click the arrow next to "States" to open the dropdown menu and then select a state.
4. Click the arrow next to "Cities & Counties" to view the list of cities and counties that are available on PeriStats. Select a city or county.
5. Next, click the "edit" link next to "Format."
6. In the popup menu, click the arrow next to "Format" to open the dropdown menu. You can choose to view all data, graphs, maps, or tables for the city or county. Select a format option.
7. Click the "search" button. This will bring you to a page containing the data, graphs, maps, or tables for the city or county.
