

HEALTHY MOMS. STRONG BABIES.

Here's how March of Dimes leads the fight for the health of all moms and babies:

RESEARCH

We fund and support research at our Prematurity Research Centers and in promising areas to find solutions and make lifesaving breakthroughs.

EDUCATE

We offer resources and programs that help moms before, during and after pregnancy and give medical professionals the tools and best practices they need.

ADVOCATE

We fight for policies in the halls of government that prioritize the health of moms and babies.

UNITE

We bring together organizations and professionals from diverse backgrounds to identify and act on solutions to improve equity and preterm birth prevention.

SUPPORT

We comfort and assist moms and families throughout every stage of the pregnancy journey, even when things don't go according to plan.

PARTNER

We partner with community organizations and health care providers to ensure moms and families have access to programs and services that support healthy pregnancies.

EACH YEAR IN NEVADA

35,756

babies are born

3,833

babies are born prematurely

1,080

babies are born with a birth defect

209

babies die before their first birthday

50,000

women live in a maternity care desert

\$198 MILLION

is the societal cost of preterm birth

In Nevada, March of Dimes is a champion for families, focusing on communities with the greatest need and fighting for the best possible care for all moms and babies.

RESEARCH

In 2018 March of Dimes invested nearly **\$20 million** in research to understand, treat and prevent the serious health problems that threaten babies. This research improves the care of mothers and babies in Nevada, throughout the United States and across the globe. At our **six Prematurity Research Centers** teams of brilliant minds from a range of disciplines look for answers and share discoveries to transform our understanding of preterm birth, including causes and preventions. Learn more at marchofdimes.org/research.

ADVOCATE

March of Dimes is a powerful voice for the needs of pregnant women, infants, children and families in Nevada. In 2019 top March of Dimes priorities include advocating to prevent preterm birth, protect moms from dying from pregnancy-related causes, and address the impact of the opioids crisis on moms, babies and families.

SUPPORT

March of Dimes helps families when a pregnancy doesn't go according to plan. In 2018 we launched the My NICU Baby™ app, providing free, easy to use information for all NICU families. Through the online Share Your Story® site and Facebook mentoring program, we bring together families impacted by the biggest health threats to mom and baby.

EDUCATE

March of Dimes helps all women have healthy pregnancies and strong babies by providing the latest health information in English and Spanish on preconception, prenatal, postpartum and newborn care. We communicate this information through our websites, social media, and community and workplace programs.

UNITE

Through our 2018 Women's Health Symposium, March of Dimes and the Nevada Action Coalition brought key MCH partners together to improve clinical practice, services and outcomes for women in Nevada. Our expert speakers shared strategies to improve equity in preterm birth and maternal morbidity and pressing local topics such as human trafficking. Symposium highlights also included an action inspiring talk on social determinants of health and the life course and policy hot topics for nurses.

PARTNER

March of Dimes partners with the Nevada Department of Health and Human Services on a collaborative initiative to reduce preterm birth and infant mortality. The initiative focuses on addressing social determinants of health and increasing the use of interventions like progesterone shots (17P) for eligible women with history of a prior preterm birth. In addition, we support Zeta Phi Beta, Inc., our national service partner, to implement Stork's Nest®, an education and prenatal care incentive program for African American women.

SOURCES AND NOTES: Births and preterm births—National Center for Health Statistics, final natality 2017. Preterm is less than 37 weeks gestation. Birth defects—Based on CDC estimate that 1 in 33 babies is born with one or more birth defect. Infant mortality—NCHS, infant mortality, 2016. Women living in maternity care desert—"Nowhere to Go", March of Dimes, 2018. Cost of preterm birth—Institute of Medicine report, 2007.

JOIN THE FIGHT

Because of friends like you, we can provide programs, tools and support for all moms and babies.
